RE: Lumber Pressure Treatments
Anglesea Avenue Pier Reconstruction
Our File: 1522-U-033

Dear Mayor Kennedy:

In response to concerns with the decking material used at the Anglesea Avenue Pier, attached please find the material specifications for the two (2) types of materials used during construction. The majority of the pier was constructed with Copper Azole Type C (CA-C) decking and a portion of the pier Ecolife 2 (EL2) decking.

Copper Azole Type C (CA-C) decking is meant to be used fresh water as well as in saltwater splash (marine) decking applications. Per the EPA, Copper Azole is a water-based wood preservative that prevents fungal decay and insect attack that is widely used throughout the United States and Canada. Copper Azole is one of the newer wood preservatives registered for treatment of lumber to be used in the resident lumber and timber market. The CA-C pressure treated wood material is not known to cause any health risks and is more adept at handling a saltwater environment than the typical pressure treated wood.

Additionally, Ecolife 2 (EL2) was used at the Anglesea Avenue Pier. EL2 is commonly used for residential and commercial decking material; however, it is not as resistant to saltwater splash. It is anticipated that the EL2 treated wood will be replaced with CA-C treated wood at the end of the season.

If you have any questions regarding this matter, please do not hesitate to contact our Toms River office.

God Bless America,

REMINGTON & VERNICK ENGINEERS

Alan B. Dittenhofer, PE, CME, PP
ARD/PAH:rd

Fax: 864-699-3101

General Comments
NOTE: Emergency telephone numbers are to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to customer service.

*** Section 2 - HAZARD(S) IDENTIFICATION ***

Classification in accordance with 29 CFR 1910.1200.
Carcinogen, Category 2
Eye Damage / Irritation, Category 2B
Skin sensitizer, Category 1B
Respiratory Sensitizer, Category 1B
Specific Target Organ Toxicity - Single Exposure, Category 3 (respiratory system)

GHS LABEL ELEMENTS
Symbol(s)

Signal Word
WARNING

Hazard Statement(s)
Suspected of causing cancer

Issue Date: 02/06/2015 Version 1.5 Print Date: 4/16/2019
Safety Data Sheet

Viance CA-C Pressure Treated Wood

Causes eye irritation
May cause an allergic skin reaction
May cause respiratory irritation
May cause allergy or asthma symptoms or breathing difficulties if inhaled

Precautionary Statement(s)

Prevention
Do not breathe dust. Use only outdoors or in a well-ventilated area. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Do not eat, drink, or smoke when using this product. Avoid release to the environment.

Response
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF SWALLOWED: Rinse mouth. DO NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

Storage
Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal
Dispose in accordance with all applicable regulations.

Hazard(s) Not Otherwise Classified
Combustible solid. Dust may form explosive mixtures with air. Wood dust is a potential health problem when wood particles from processes such as sanding, drilling, machining, and cutting become airborne. Inhalation of these particles may cause allergic respiratory symptoms, mucosal and non-allergic respiratory symptoms, and cancer.

Component Related Regulatory Information

This product may be regulated, have exposure limits or other information identified as the following: Wood dust, all soft and hard woods, Wood dusts-soft woods, Wood dusts-hard wood, Copper compounds, Copper (Copper Compound), Ethanolamine (141-43-5), and Ammonia (7664-41-7) [applies only if treatment facility adds ammonia locally. Check with treatment facility to determine applicability].
Additional Information

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200) and the Canadian Workplace Hazardous Materials Information System (WHMIS).

*** Section 4 - FIRST-AID MEASURES ***

Inhalation
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

Skin Contact
IF wood splinters are injected under the skin, get medical attention immediately. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention.

Eye Contact
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation occurs: Get medical advice/attention.

Ingestion
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

Most Important Symptoms/Effects
Acute
Eye irritation, allergic skin reaction,

Delayed
Respiratory ailments.

Indication of Immediate Medical Attention and Special Treatment Needed, If Needed
Respiratory ailments and pre-existing skin conditions may be aggravated by exposure to wood dust.

*** Section 5 - FIRE-FIGHTING MEASURES ***

Suitable Extinguishing Media
Use regular dry chemical, carbon dioxide, water spray, or regular foam. Use water to wet down wood and to reduce the likelihood of ignition or dispersion of dust into the air.
Large fires: water spray or fog, alcohol-resistant foam.

Unsuitable Extinguishing Media
Do not scatter spilled material with high-pressure water streams.

Specific Hazards Arising from the Chemical
Combustible solid. Dust may form explosive mixtures with air.

Hazardous Decomposition Products
Combustion: copper compounds, oxides of carbon, oxides of nitrogen
Safety Data Sheet

Viance CA-C Pressure Treated Wood

Special Protective Equipment and Precautions for Firefighters

Wood is combustible and dusts may form explosive mixtures with air in the presence of an ignition source. Wear full protective fire-fighting gear including self-contained breathing apparatus (SCBA) for protection against possible exposure.

Fire Fighting Measures

Move container from fire area if it can be done without risk. Dike for later disposal. Cool containers with water spray until well after the fire is out. Withdraw immediately in case of rising sound from venting safety device. Keep unnecessary people away, isolate hazard area and deny entry. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas.

NFPA Ratings: Health: 2 Fire: 1 Reactivity: 0 Other: 0
Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe

*** Section 6 - ACCIDENTAL RELEASE MEASURES ***

Personal Precautions, Protective Equipment and Emergency Procedures

No containment procedures are needed, as this product cannot spill or leak the preservative. Keep away from sparks and flame.

Methods and Materials for Containment and Cleaning Up

Wear appropriate protective equipment and clothing during clean-up. Wet down accumulated dusts prior to sweeping or vacuuming in order to prevent explosion hazards. Sweep up or vacuum small pieces and dusts and place in appropriate container for disposal. Gather larger pieces by an appropriate method. Avoid the generation of airborne dusts during clean-up. Do not inhale dusts during cleanup.

*** Section 7 - HANDLING AND STORAGE ***

Precautions for Safe Handling

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust. Use only outdoors or in a well-ventilated area. Wear respiratory protection. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Do not eat, drink, or smoke when using this product. Avoid working with freshly treated wood. When handling treated wood, wear washable or disposable overalls or long-sleeved shirt and long pants, chemical resistant gloves, and socks plus industrial grade safety boots with chemical resistant soles. Contaminated clothing should be removed and laundered before reuse. DO NOT BURN TREATED WOOD.

Conditions for Safe Storage, including any Incompatibilities

Maintain good housekeeping procedures, such as sweeping regularly to avoid accumulation of dusts. Store product in a dry area away from excessive heat, sparks and open flame. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Incompatibilities: strong acids, alkalis, and oxidizing materials

Appropriate Engineering Controls

Use exhaust ventilation when cutting, grinding or sanding in enclosed areas and if it is anticipated the exposure limits for wood dust may be exceeded during working with this product. Ventilation equipment should be explosion-resistant if explosive concentrations of material are present. Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits.

Personal Protective Equipment

Eyes/Face Protection

Wear safety glasses with side shields when handling, cutting, sanding or grinding this material. Use a face shield during processes that may generate excessive dusts and splinters. Provide an emergency eye wash fountain in the immediate work area.

Skin Protection

Use impervious gloves. Wear chemical resistant apron if splash potential is minimal. If splash potential is great, as during maintenance activities, wear impervious clothing and chemical resistant footwear.

Respiratory Protection

If ventilation is not sufficient to effectively prevent buildup of vapors, aerosols, mists, or dust, appropriate NIOSH respiratory protection must be provided. Respirators should be selected by and used under the direction of a trained health and safety professional following regulatory requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). A written respiratory protection program, including provisions for medical certification, training, fit testing, exposure assessments, maintenance, inspection, cleaning, and convenient, sanitary storage must be implemented.

For plywood products only: A NIOSH approved full-face air purifying respirator with combination formaldehyde/organic vapor cartridge and a P100 filter is required if formaldehyde vapor levels exceed the listed exposure limits. Air purifying respirators should not be used in oxygen deficient or IDLH atmospheres or if exposure concentrations exceed ten (10) times the published exposure limits.

*** Section 10 - STABILITY AND REACTIVITY ***

Reactivity

No reactivity hazard is expected.

Chemical Stability

This is a stable material.

Possibility of Hazardous Reactions

Hazardous polymerization will not occur.

Conditions to Avoid

Keep away from excessive heat, sparks and open flame. Keep away from incompatible materials.

Incompatible Materials

Strong acids, alcohols, and strong oxidizing materials

Hazardous Decomposition Products

Combustion: copper compounds, oxides of carbon, oxides of nitrogen

*** Section 11 - TOXICOLOGICAL INFORMATION ***

Acute Toxicity

Wood dusts may be irritating to the eyes, skin and respiratory tract. Prolonged or repeated inhalation of wood dust may cause respiratory irritation, recurrent bronchitis and prolonged colds. Depending on the species of wood, recurrent exposure may cause allergic skin and respiratory reactions in some individuals.

Inhalation of high concentrations of Monoethanolamine have been reported to cause pulmonary, liver, kidney and skin damage in experimental animals. Monoethanolamine is corrosive to the eyes, skin, respiratory system and gastrointestinal tract, and may cause permanent damage to the eyes. Monoethanolamine may be absorbed through the skin in harmful amounts and may cause allergic skin reactions. Monoethanolamine exposures may cause damage to the nervous system, lungs, liver and kidneys.

The Copper complex expressed as copper oxide in this product contains copper salts which, upon ingestion of high oral doses, can cause gastrointestinal disturbances, anemia, and secondary liver and kidney damage.

Product Analysis – LD50/LC50

Oral LD50 Rat believed to be >5,000 mg/kg; Dermal LD 50 Rat believed to be >2,000 mg/kg; Inhalation LC50, No data.

Oral LD50 Rat 1350 mg/kg

Information on Likely Routes of Exposure

Inhalation
May cause respiratory tract irritation.

Ingestion
May be harmful if swallowed.

Skin Contact
May be harmful in contact with skin. May cause an allergic skin reaction.

Eye Contact
May cause eye irritation.

Immediate Effects
Allergic skin reaction, respiratory system damage

Delayed Effects
Respiratory ailments.

Medical Conditions Aggravated by Exposure
Pre-existing eye, respiratory system and skin conditions.

Irritation/Corrosivity Data
Respiratory tract irritation, skin burns, eye burns

Respiratory Sensitization
No data available.

Dermal Sensitization
May cause an allergic skin reaction.

Germ Cell Mutagenicity
No data available for the mixture.

Carcinogenicity

Component Carcinogenicity
Wood/Wood Dust (Not Available)

ACGIH: A1 - Confirmed Human Carcinogen (related to Wood dusts-hard wood)
IARC: Monograph 100C [2012]; Monograph 62 [1995] (Group 1 (carcinogenic to humans), related to Wood dust, all soft and hard woods)
NTP: Known Human Carcinogen (related to Wood dust, all soft and hard woods)
DVG: Category 3B (could be carcinogenic for man, except beech and oak wood dust, related to Wood dust, all soft and hard woods)
OSHA: Present (related to Wood dust, all soft and hard woods)

Other Information
Disclaimer: Supplier gives no warranty of merchantability or of fitness for a particular purpose. Any product purchased is sold on the assumption the purchaser will make his own tests to determine the quality and suitability of the product. Supplier expressly disclaims any and all liability for incidental and/or consequential property damage arising out of the use of this product. No information provided shall be deemed to be a recommendation to use any product in conflict with any existing patent rights. Read the Material Safety Data Sheet before handling product.

End of Sheet VIA-183
Safety Data Sheet

Ecolife 2 Pressure Treated Wood

*** Section 1 - IDENTIFICATION***

Product Identifier:
Fungicide treated wood

Recommended Use
Lumber

Restrictions on Use
None known.

Manufactured by:

Spartanburg Forest Products
1431 Hwy 101 South
Greer, SC 29651

Phone: 864-699-3100
Fax: 864-699-3101

General Comments
NOTE: Emergency telephone numbers are to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to customer service.

*** Section 2 - HAZARD(S) IDENTIFICATION***

Classification in accordance with 29 CFR 1910.1200.
Carcinogen, Category 2
Eye Damage / Irritation, Category 2B
Skin sensitizer, Category 1B
Respiratory Sensitizer, Category 1B
Specific Target Organ Toxicity - Single Exposure, Category 3 (respiratory system)

GHS LABEL ELEMENTS
Symbol(s)

Signal Word
WARNING

Hazard Statement(s)
Suspected of causing cancer

Issue Date: 02/06/2015 v1.1
Print Date: 4/16/19
Safety Data Sheet

Ecolife 2 Pressure Treated Wood

Causes eye irritation
May cause an allergic skin reaction
May cause respiratory irritation
May cause allergy or asthma symptoms or breathing difficulties if inhaled

Precautionary Statement(s)

Prevention
Do not breathe dust. Use only outdoors or in a well-ventilated area. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Do not eat, drink, or smoke when using this product. Avoid release to the environment

Response
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

Storage
Store locked up.

Disposal
Dispose in accordance with all applicable regulations.

Hazard(s) Not Otherwise Classified
Combustible solid. Dust may form explosive mixtures with air. Wood dust is a potential health problem when wood particles from processes such as sanding, drilling, machining, and cutting become airborne. Inhalation of these particles may cause allergic respiratory symptoms, mucosal and non-allergic respiratory symptoms, and cancer.

Component Related Regulatory Information
This product may be regulated, have exposure limits or other information identified as the following: Wood dust, all soft and hard woods, Wood dusts-soft woods, Wood dusts-hard wood.

Component Information/Information on Non-Hazardous Components.
This product is considered hazardous under the criteria specified in 29 CFR 1910.1200 (Hazard Communication Standard) and the Canadian Workplace Hazardous Materials Information System (WHMIS).
**Section 4 - FIRST-AID MEASURES**

**Inhalation**
IF INHALED: If dusts are inhaled, remove person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, have trained personnel give oxygen to the victim; Seek medical attention.

**Skin Contact**
If wood splinters are injected under the skin, get medical attention immediately. IF ON SKIN (or hair):
Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention.

**Eye Contact**
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation occurs: Get medical advice/attention.

**Ingestion**
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

**Most Important Symptoms/Effects**
**Acute**
Eye irritation, allergic skin reaction,

**Delayed**
Respiratory ailments.

**Indication of Immediate Medical Attention and Special Treatment Needed, If Needed**
Respiratory ailments and pre-existing skin conditions may be aggravated by exposure to wood dust.

**Section 5 - FIRE-FIGHTING MEASURES**

**Suitable Extinguishing Media**
Use regular dry chemical, carbon dioxide, water spray, or regular foam. Use water to wet down wood and to reduce the likelihood of ignition or dispersion of dust into the air. Large fires: water spray or fog, alcohol-resistant foam.

**Unsuitable Extinguishing Media**
Do not scatter spilled material with high-pressure water streams.

**Specific Hazards Arising from the Chemical**
Combustible solid. Dust may form explosive mixtures with air.

**Hazardous Decomposition Products**
Combustion: aldehydes, carbon monoxide, carbon dioxide, and organic acids.

**Special Protective Equipment and Precautions for Firefighters**
Wood is combustible and dusts may form explosive mixtures with air in the presence of an ignition source. Wear full protective fire-fighting gear including self-contained breathing apparatus (SCBA) for protection against possible exposure.
Safety Data Sheet

Ecolife 2 Pressure Treated Wood

Fire Fighting Measures
Move container from fire area if it can be done without risk. Dike for later disposal. Cool containers with water spray until well after the fire is out. Withdraw immediately in case of rising sound from venting safety device. Keep unnecessary people away, isolate hazard area and deny entry. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas.

NFPA Ratings: Health: 1 Fire: 1 Reactivity: 0 Other: 0
Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe

*** Section 6 - ACCIDENTAL RELEASE MEASURES ***

Personal Precautions, Protective Equipment and Emergency Procedures
No containment procedures are needed, as this product cannot spill or leak the preservative. Keep away from sparks and flame.

Methods and Materials for Containment and Cleaning Up
Wear appropriate protective equipment and clothing during clean-up. Wet down accumulated dusts prior to sweeping or vacuuming in order to prevent explosion hazards. Sweep up or vacuum small pieces and dusts and place in appropriate container for disposal. Gather larger pieces by an appropriate method. Avoid the generation of airborne dusts during clean-up. Do not inhale dusts during cleanup.

*** Section 7 - HANDLING AND STORAGE ***

Precautions for Safe Handling
Do not generate airborne dusts in the presence of an ignition source when sawing, cutting or grinding wood. Wash hands after handling and before eating. Avoid contact of wood dusts with skin and eyes. Do not breathe wood dusts. Do not eat, drink or smoke when handling this material or in areas where dusts of this product are present. When handling treated wood, wear washable or disposable coveralls or long-sleeved shirt and long pants, chemical resistant gloves, and socks plus industrial grade safety boots with chemical resistant soles. Contaminated clothing should be removed and laundered before reuse.

Conditions for Safe Storage, Including any Incompatibilities
Maintain good housekeeping procedures, such as sweeping regularly to avoid accumulation of dusts. Store product in a dry area away from excessive heat, sparks and open flame. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

*** Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION ***

Ecolife 2 Pressure Treated Wood

NW Territories:  5 mg/m³ TWA (related to Wood dust, all soft and hard woods)
                 10 mg/m³ STEL (related to Wood dust, all soft and hard woods)

Nunavut:       5 mg/m³ TWA (related to Wood dust, all soft and hard woods)
                 10 mg/m³ STEL (related to Wood dust, all soft and hard woods)

Ontario:       5 mg/m³ TWA (related to Wood dusts-soft woods)
                 10 mg/m³ STEL (related to Wood dusts-soft woods)

Quebec:        5 mg/m³ TWAEV (total dust, except red cedar, containing no asbestos and less than 1% crystalline silica) (related to Wood dust, all soft and hard woods)

Saskatchewan:  5 mg/m³ TWA (certain species) (related to Wood dusts-soft woods)
                 10 mg/m³ STEL (related to Wood dusts-soft woods)

Yukon:         5 mg/m³ TWA (non-allergenic); 2.5 mg/m³ TWA (allergenic, including cedar, mahogany, teak) (related to Wood dust, all soft and hard woods)
                 10 mg/m³ STEL (non-allergenic); 5 mg/m³ STEL (allergenic, including cedar, mahogany, teak) (related to Wood dust, all soft and hard woods)

Appropriate Engineering Controls
Use exhaust ventilation when cutting, grinding or sanding in enclosed areas and if it is anticipated the exposure limits for wood dust may be exceeded during working with this product. Ventilation equipment should be explosion-resistant if explosive concentrations of material are present. Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits.

Personal Protective Equipment

Eyes/Face Protection
Wear safety glasses with side shields when handling, cutting, sanding or grinding this material. Use a face shield during processes that may generate excessive dusts and splinters. Provide an emergency eye wash fountain in the immediate work area.

Skin Protection
Wear puncture resistant work gloves, such as leather.

Respiratory Protection
If ventilation is not sufficient to effectively prevent buildup of aerosols, mists, or dust, appropriate NIOSH respiratory protection must be provided. Respirators should be selected by and used under the direction of a trained health and safety professional following regulatory requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). A written respiratory protection program, including provisions for medical certification, training, fit testing, exposure assessments, maintenance, inspection, cleaning, and convenient, sanitary storage must be implemented.

LFL: 40 g/m3 (Wood dust)

*** Section 10 - STABILITY AND REACTIVITY ***

Chemical Stability
This is a stable material.

Possibility of Hazardous Reactions
Hazardous polymerization will not occur.

Conditions to Avoid
Keep away from excessive heat, sparks and open flame. Keep away from incompatible materials.

Incompatible Materials
Strong oxidizing agents (peroxides, chlorine, strong acids) and drying oils.

Hazardous Decomposition
Hazardous decomposition products from combustion include irritating and toxic fumes and gases of carbon monoxide, carbon dioxide, aldehydes, and organic acids.

*** Section 11 - TOXICOLOGICAL INFORMATION ***

Acute Toxicity
Wood dusts may be irritating to the eyes, skin and respiratory tract. Prolonged or repeated inhalation of wood dust may cause respiratory irritation, recurrent bronchitis and prolonged colds. Depending on the species of wood, recurrent exposure may cause allergic skin and respiratory reactions in some individuals.

Component Analysis - LD50/LC50
No LD50/LC50's are available for this product's components.

Information on Likely Routes of Exposure

Inhalation
May cause respiratory tract irritation.

Ingestion
May be harmful if swallowed.

Skin Contact
May be harmful in contact with skin. May cause an allergic skin reaction.

Eye Contact
Causes serious eye irritation.

Immediate Effects
Allergic skin reaction, respiratory system damage

Delayed Effects
Causes damage to organs through prolonged or repeated exposure.
Safety Data Sheet

Ecolife 2 Pressure Treated Wood

Medical Conditions Aggravated by Exposure
Pre-existing eye, respiratory system and skin conditions.

Irritation/Corrosivity Data
Respiratory tract irritation, skin irritation, eye irritation

Respiratory Sensitization
No data available.

Dermal Sensitization
May cause an allergic skin reaction.

Germ Cell Mutagenicity
No data available for the mixture.

Carcinogenicity

Component Carcinogenicity

Wood/Wood dust (Not Available)

ACGIH: A1 - Confirmed Human Carcinogen (related to Wood dusts-hard wood)
NIOSH: potential occupational carcinogen (related to Wood dust, all soft and hard woods)
NTP: Known Human Carcinogen (related to Wood dust, all soft and hard woods) (Select Carcinogen)
IARC: Monograph 62 [1995] (related to Wood dust, all soft and hard woods) (Group 1 (carcinogenic to humans))

Reproductive Toxicity
No information available for the product.

Specific Target Organ Toxicity - Single Exposure
May cause respiratory system irritation.

Specific Target Organ Toxicity - Repeated Exposure
No information available for the product.

Aspiration Hazard
Not expected to be an aspiration hazard.

*** Section 12 - ECOLOGICAL INFORMATION***

Ecotoxicity
This product contains small amounts of fungicides, which when released into the environment, are expected to adversely affect or destroy contaminated plants. May be harmful or fatal to wildlife.

Component Analysis - Aquatic Toxicity
No ecotoxicity data are available for this product's components.

Persistence and Degradability
No information available for the product.

Bioaccumulation Potential
No information available for the product.
Safety Data Sheet

Ecolife 2 Pressure Treated Wood

Mobility in Soil
No information available for the product.

*** Section 13 - DISPOSAL CONSIDERATIONS ***

Disposal Methods
Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.

Disposal of Contaminated Packaging
Component Waste Numbers
The U.S. EPA has not published waste numbers for this product's components.

*** Section 14 - TRANSPORT INFORMATION ***

US DOT Information
Shipping Name: Not regulated as a hazardous material

Canada Transportation of Dangerous Goods Information
Shipping Name: Not regulated as a dangerous good

*** Section 15 - REGULATORY INFORMATION ***

U.S. Federal Regulations
All components are on the U.S. EPA TSCA Inventory List. This product is pressure treated with small amounts of a FIFRA registered wood preservative which falls under Environmental Protection Agency regulations. Components not identified on this non-confidential inventory are exempt from listing (i.e. pesticides).

U.S. Federal Regulations
None of this product's components are listed under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).

SARA 311/312: Acute Health Yes; Chronic Yes; Fire No; Pressure No; Reactive No

# Safety Data Sheet

**Ecolife 2 Pressure Treated Wood**

The following statement is provided under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65): WARNING! Drilling, sawing, sanding, or machining wood products generate wood dust and other substances known to the state of California to cause cancer.

Other state regulations may apply. Check individual state requirements

**Component Analysis - WHMIS IDL**

Components of this material have been checked against the Canadian WHMIS Ingredients Disclosure List. The List is composed of chemicals which must be identified on SDSs if they are included in products which fall under WHMIS criteria specified in the Controlled Products Regulations and present above the threshold limits listed on the IDL. No components are listed in the WHMIS IDL.

**WHMIS Classification(s)**

All components are on the Canadian Domestic Substances (DSL) or Non-Domestic Substances Inventory (NDSL) Lists, or are exempt from listing.

**WHMIS Classification: D2A, D2B**
